### Download and Import

#### Starting Logbook No.

Starting Logbook No when downloading dives from a dive computer or importing UDDF files

#### Scanning Timeout

Maximum time allowed in millisecond to scan and find Bluetooth Low Energy (BLE) devices. Default is 10000 ms

#### Connection Timeout

Maximum time allowed in millisecond to connect to a Bluetooth Low Energy (BLE) device. Default is 10000 ms

#### libdivecomputer Timeout

Maximum time allowed in millisecond to start the download from a dive computer. Default is 1000 ms

#### libdivecomputer Log Level

Information

#### Default Equipment Group

Assign default equipment group when downloading computer/importing dives

#### Force Matched Specs

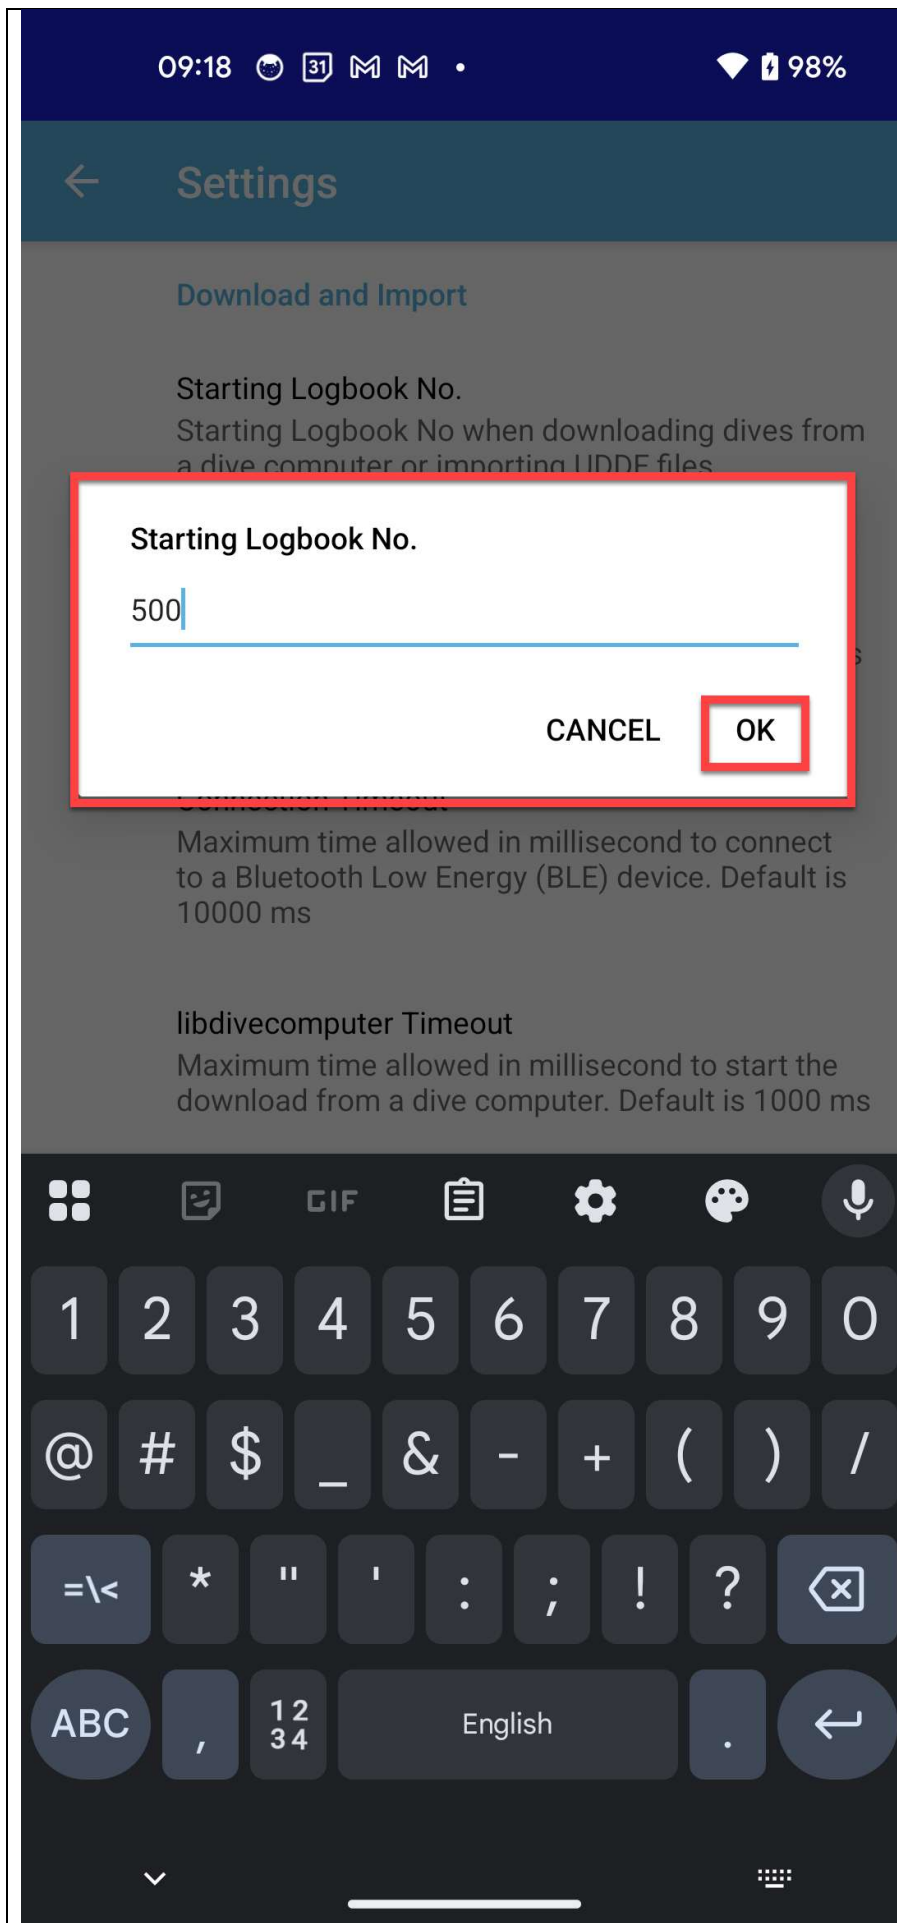

Force a perfect match between the Downloaded/Imported cylinders and the Default Equipment Group

#### Error Margin on Match (%)

Error margin allowed when comparing Downloaded/Imported equipments against

Scroll down and tap Starting Logbook No.

Enter the Logbook No. you want the downloaded dives to start at.

You can change the Starting Logbook No. whenever there is a discrepancy between the NEXT Logbook No. on your dive computer and MABAI.

After the download process, MABAI have the functionalities to merge and to renumber dives.

Tap OK to continue.
