

My Air Buddy And I

Version: 1.07.02 Beta

Build: 73

Released Date: 3/5/2026

Language: English

Release Notes

Release Notes

- Fixed bugs
- Fixed memory leaks
- Optimized all graphics, Imperial and Metric
- Fixed error on required fields on Dive Summary
- Dive Computer Firmware supports version like 9.9.9 or X.X.X
- Prep SAC and RMV for the next release
- Improve logging functions
 - You may delete all old files in \YourPhone\Internal shared storage\Documents\MABAI\logcat\
- Improve navigation when editing a dive
- Support Database Restore from DB version 8 to DB version 9

Not used for this release:

- Support Database Restore from DB version 6 to DB version 9
- Helium when diving
- Stage when diving
- Altitude when diving
- Dive tables
- Bank, Cylinder and Hose specs in Calculate Nitrox and Trimix
- CCR
- Play Age Signals API

Known Issues:

- Saving data for Bottom Gas only
- Perdix might stop connecting. Just recreate a new connection and none of the dive data will be lost
- Pairing Dive Computer with PIN
